Escalator LED Step Demarcation Light

Available Now!

SPARES is pleased to introduce our new LED Escalator Step Demarcation Light.

This new light can directly replace current fluorescent style assemblies. These lights are available in both 115VAC and 24VAC parts. For a limited time, we are offering these lights at a 15% discount from our list prices!

24 VAC..... Part # KM992192G01 *Current Special Pricing:* \$350.00
115 VAC..... Part # KM992192G02 *Current Special Pricing:* \$361.00

We have all seen the proliferation of LED lighting in the automotive industry, as well as in decorative Christmas lighting. SPARES has designed this new lighting fixture to provide the same benefits for escalator equipment owners. This product provides an extended life of 3 to 5 times over comparable fluorescent lamps, and gives off a pleasant green light shade. The product offers easy replacement, as it mounts in the same way as current light assemblies.

Contact SPARES today for additional information regarding the application of this new lighting product.

Note: LED Demarcation Lighting is a new technology and the wording in previous versions of A17.1 denotes fluorescent lighting. We have not seen resistance to using LED technology, but we recommend that you check with local authorities for acceptance.
